# Notes to Lifting Capacity

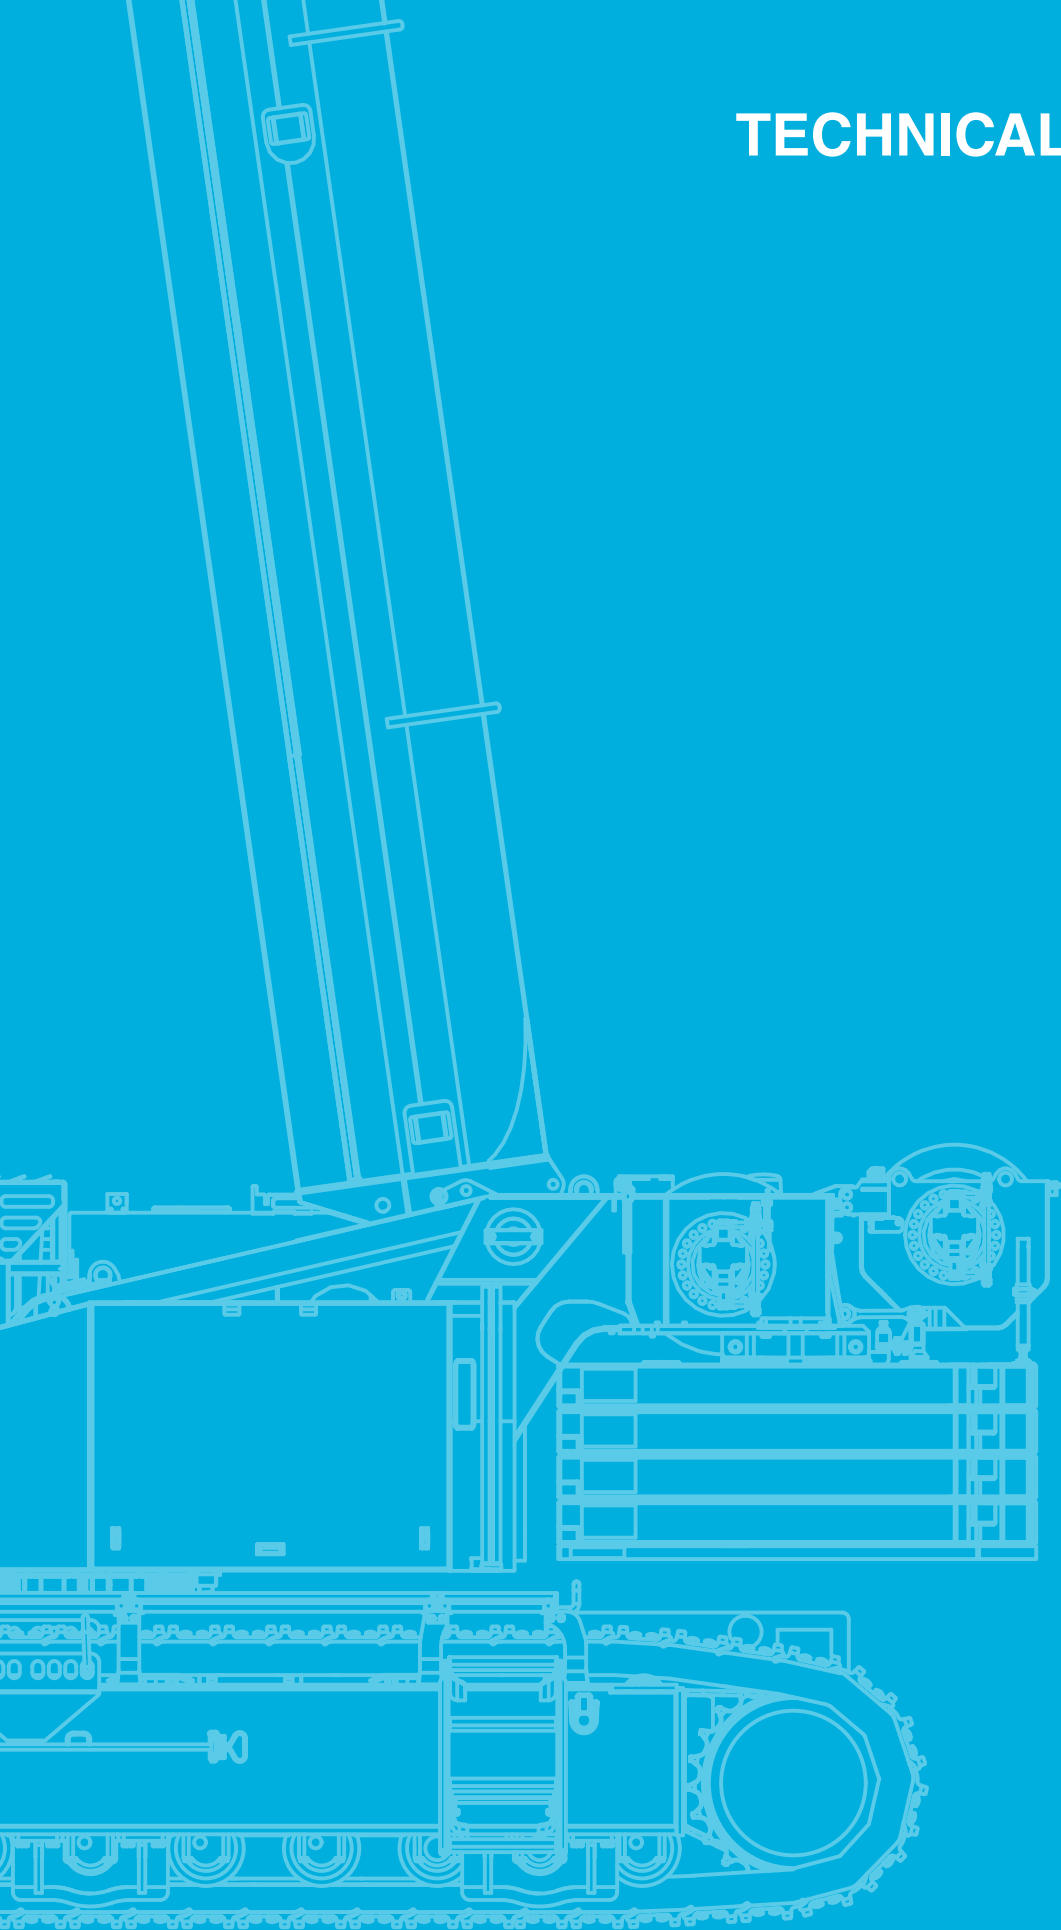

Ratings are in compliance with ASME B 30.5.

Weight of hook blocks and slings is part of the load, and is to be deducted from the capacity ratings.  
Consult operation manual for further details.

**Note:** Data published herein is intended as a guide only and shall not be construed to warrant applicability for lifting purposes.  
Crane operation is subject to the computer charts and operation manual both supplied with the crane.

# TECHNICAL DESCRIPTION

# Technical Description

## Basic machine

### Carrier

Carrier comprising a carbody, 4 extension beams and 2 crawlers; easy pin connection between crawler and extension beams.

|                             |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
|-----------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Carbody</b>              | Bending and torsion resistant welding construction, made of high strength fine grain steel.<br>Bottom car body design suitable for any trailer type.<br>Hydraulic and electric lines are protected and guided inside sliding energy chains with quick connections to crawler drives.                                                                                                                                                                                                                                                                                                                                                        |
| <b>Track extension</b>      | Track base infinitely adjustable (incl. non-symmetrical)<br>The IC-1 Plus control system is automatically determining the permissible lifting capacity based on the track extension, slewing position and ground roll/list angle<br>Track adjustment possible on the spot or during traveling (control from cabin or with remote control)<br>Integrated protected extension cylinders<br>Removable track extension beams (incl. hydraulic cylinders), quick couplings and electric connectors for easy coupling/disconnecting of hydraulic hoses and elec cables.<br>Clear indication of component weight                                   |
| <b>Track frame</b>          | B9HD components (10.2 in. pitch), excavator type, oil lubricated sealed rollers and idler wheel<br>13 bottom rollers and 4 chain guides on each side<br>2-bar 39.4 in. crawler shoes<br>Large integrated platform above the track shoes with sliding platforms between crawlers and car body;<br>two integrated inclinable ladders at each crawler frame                                                                                                                                                                                                                                                                                    |
| <b>Track frame drive</b>    | The tracks are powered by one hydraulic motor each through closed planetary gear drive running in oil bath, equipped with spring-applied hydraulically released holding brakes; each crawler speed is infinitely variable, both independently and in opposite direction. Drives are equipped with counterbalance valve and speed sensor.<br>Traction force: 326,000 lbf in total<br>Travelling speed: up to 1.43 mph                                                                                                                                                                                                                        |
| <b>Track frame assembly</b> | Self-assembly with 4 x container lift points accessible from ground and platform<br>Pinning of track frames to extension beams is manual; pinning is done from the outside<br>Hydraulic and electric quick coupling for quick and reliable assembly/disassembly                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Assembly jacks</b>       | Outrigger legs with 2 positions (transport, in longitudinal direction and rigging, in outward direction)<br>Outrigger cylinders can tumble (with assistance spring allowing low ergonomic human force) to maximize ground clearance during travelling.<br>Jacks with integrated check valves and pressure sensor, allowing auto levelling                                                                                                                                                                                                                                                                                                   |
| <b>Outriggers</b>           | 4 rectangular outrigger steel pads $A = 0.56 \text{ ft}^2$<br>Outrigger pads can remain on cylinders, even in tumbled position (no need to detach and handle pads, no impact on ground clearance)<br>2 x 2 handles to allow comfortable handling; storage place at the side of the outrigger leg                                                                                                                                                                                                                                                                                                                                            |
| <b>Central ballast</b>      | 2 x steel box type central ballast with 16,540 lb each<br>Anti-slip top surface; integrated lift points; accessible manual pinning to secure central ballast<br>No loose parts<br>Geometry with slope angle to mitigate ground interference whilst traveling on rough terrain<br>On front central ballast: large rack plate for tool box or other customized storage items<br>On rear central ballast: large robust open top box, integrated in central ballast, for storage of e.g. slings.<br>Includes automatic counterweight detection<br>Upper counterweight is positioned on central ballast for automatic counterweight self-rigging |

# Technical Description

## Basic machine

### Superstructure

Bending and torsion resistant welding construction, made off high strength fine grain steel.

|                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |

| <b>Slewing drive</b>                            | Powerful dual slewing drives with spring-loaded multi-disc brake<br>Mechanical house locking in 0° and 180° positions, controlled through hydraulic cylinder from cabin; allows robust travelling under maximum gradeability and transport on trailer with free boom (no need to tie down boom head)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                        |
| <b>Hoist</b>                                    | Hoist powered with adjustable hydraulic motor and planetary gear (running in oil bath), with spring applied hydraulically released multi disk brakes and a lowering brake valve for load lowering<br>Resolver (hoist rotation indicator)<br>1.02 in. rope, length H1 = 804 ft, line pull = 30,400 lbf (30,700 lb)<br>Includes load spectrum monitoring: device to record load spectrum of hoist<br>Preparation for auxiliary hoist, preparation in steel structure and hydraulic system for future installation of auxiliary hoist; includes 2nd deflector sheave in main boom tip                                                                                                                                                                                                                                                                                                                                                          |
| <b>Control system IC-1</b>                      | With integrated load moment indicator acc. EN13000; color display; displaying of current operating conditions, load charts, fault indicator; signal lights indicating LMI-load; crane data logger<br>Calculation of lifting capacity according to track base and ground angle<br>Variable track width possible (3 track positions)<br>Monitoring of each track frame (horizontal position)<br>Detection of counterweight and central ballast and warning message in case the actual weight does not match with the selected configuration<br>Hook height indication: displaying and programmability of the hook height H1 by IC-1<br>Working range limiter: displaying and programmability of the work range limits by IC-1<br>Anemometer: disconnectable, to allow use with all extensions<br>Remote control: control of rigging and operations via wireless remote control, for all functions incl. travelling and self-assembly (option) |
| <b>Cabin</b>                                    | Type 2.87 ft; infinitely tiltable 16°; sliding window in rear of cab and door; fold-out front window; handrails; tinted safety glass; pull-down sun visor and light curtains.<br>Seat heating<br>Cabin access platform: large platform at front of cabin, with positioning slots for ladder for easy access to cabin, including when crane is still on trailer (engine start)<br>Side platform electrically extendable with 2 push buttons at front platform (accessible from ladder) and inside cabin<br>Heating cabin: engine independent warm water diesel powered heating with 5 kW heating power<br>With timer<br>Radio CD: radio with CD-player with USB connector, Aux-In and Bluetooth® connection<br>Air conditioning: air-conditioning with 5 kW rated cooling capacity                                                                                                                                                           |
| <b>Boom</b>                                     |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             |
| <b>Telescopic boom</b>                          | 42.3 ft - 196.9 ft; Single cylinder telescoping system, automatic telescoping; Attachments for all equipment and extensions; 5 steel sheaves integrated in boom head for max. capacity of 290,700 lb (345,000 lb with additional heavy lift sheave (option))                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Sheaves</b>                                  | Steel sheaves D520 (for D 1.02 in. rope) with 5.1 in. / 7.5 in. double roller bearing, same type in the whole crane; sheaves are equipped with grease points                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |

# Technical Description

## Optional Equipment (non-exhaustive)

### Carbody

|                                               |                                                                                                     |
|-----------------------------------------------|-----------------------------------------------------------------------------------------------------|
| <b>Hydraulic track frame – pinning system</b> | Track frames are pinned to extension beams by means of a portable mobile hydraulic pinning cylinder |
| <b>Automated central lubrication</b>          | Electronically controlled automated lubrication of the extension beam sliding pads                  |

### Track frame

|                      |                                                                                                                                 |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------|
| <b>Crawler shoes</b> | 39.4 in. flat shoes<br>47.2 in. flat shoes<br>47.2 in. 2-bar shoes<br>39.4 in. Polyamid plastic pads (for 39.4 in. 2-bar shoes) |
|----------------------|---------------------------------------------------------------------------------------------------------------------------------|

### Superstructure

|                       |                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |
|-----------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Engine ECE R96</b> | <b>Optional for non-regulated markets:</b> Mercedes-Benz diesel engine, type OM 936 LA, 6 cylinder, 220 kW (295 HP) at 1800 rpm, torque 1250 Nm at 1200 rpm.<br>The engine complies with emission standard ECE R96 (comparable to EU Stage III A /EPA Tier 3).<br>Stainless steel silencer with spark-arrestor<br><b>Note: no CE conformity</b>                                                                                                                                                                                                                                                                                     |
| <b>Aux hoist H2</b>   | 2nd hoist; Spring-loaded multi-disc brake; Resolver (hoist rotation indicator); Incl. quick couplings;<br>Rope twist prevention is not included<br>Can be self-assembled on counterweight-stack, for various counterweight configurations<br>1.02 in. rope, length H1 = 804 ft, line pull = 30,400 lbf (30,700 lb)<br>Convenient and safe reeving with reeving rope and rope guiding stick<br>Includes 1.02 in. rope socket<br>Includes load spectrum monitoring: device to record load spectrum of hoists with memory box attached to hoist winch to allow recording of loads irrespective of the crane the winch is installed on. |

### Jib – Extensions

|                                       |                                                                                                                                                                                                                                                                                                                                                                                                                             |
|---------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>HAV 16.4 ft</b>                    | 16.4 ft; Lattice jib, manual offset 0°/18°/36° with hydraulic assist cylinder; 2-sheave head (steel sheaves for 1.02 in. rope); Incl. transport storage<br>Consist of 11.5 ft foot section + 4.9 ft tip section                                                                                                                                                                                                             |
| <b>HAV-HY 16.4 ft</b>                 | 16.4 ft; Lattice jib, hydraulic offset from 0° to 36° with two hydraulic cylinders, adjustable under load; 2-sheave head (steel sheaves for 1.02 in. rope); Incl. transport storage<br>Consist of 11.5 ft foot section + 4.9 ft tip section                                                                                                                                                                                 |
| <b>HAV 75.5 ft</b>                    | 75.5 ft; Lattice jib, manual offset 0°/18°/36° with hydraulic assist cylinder; 2-sheave head (steel sheaves for 1.02 in. rope); Incl. transport storage (only 16.4 ft jib can be stowed in transport position)<br>Consist of 11.5 ft foot section + 4.9 ft tip section + 19.7 ft intermediate section + 39.4 ft intermediate section<br>Possible jib length: 16.4 ft, 36.1 ft, 55.8 ft, 75.5 ft                             |
| <b>HAV-HY 75.5 ft</b>                 | 75.5 ft; Lattice jib, hydraulic offset from 0° to 36° with two hydraulic cylinders, adjustable under load; 2-sheave head (steel sheaves for 1.02 in. rope); Incl. transport storage (only 16.4 ft jib can be stowed in transport position)<br>Consist of 11.5 ft foot section + 4.9 ft tip section + 19.7 ft intermediate section + 39.4 ft intermediate section<br>Possible jib length: 16.4 ft, 36.1 ft, 55.8 ft, 75.5 ft |
| <b>R1 (Swing-away rooster sheave)</b> | Swing-away rooster sheave for 1.02 in. rope, incl. transport storage; For single-reeving high speed operation with elevated hook height; incl. electrical equipment and hoist limiter.                                                                                                                                                                                                                                      |

### Hook Blocks

|                                   |                                                                                                                                                                                                                                                                                                                 |
|-----------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Hook block 160-5-26-E or D</b> | For 1.02 in. rope, 5-sheave (11-lines) useable up to 318,100 lb, NOT SUITABLE FOR MAX. LOAD 345,000 lb<br>Vario system with removable side weight (cheek plates) (2,430 lb or 2,870 lb);<br>with removed plates, the hook block weight corresponds to the weight of the 3-sheave block<br>Single or double hook |
| <b>Hook block 100-3-26-E or D</b> | For 1.02 in. rope, 3-sheave (7-line) – useable up to 206,600 lb<br>Single or double hook                                                                                                                                                                                                                        |
| <b>Hook block 41-1-26-E or D</b>  | For 1.02 in. rope, 1-sheave (3-line) – useable up to 90,300 lb<br>Single or double hook                                                                                                                                                                                                                         |
| <b>Headache ball 16-0/26-E</b>    | For 1.02 in. rope – hook, red – useable up to 30,400 lb                                                                                                                                                                                                                                                         |
