Weight Lifted: **1,000 US tons**  
Number of Labor Hours: **4,000**

### CRANE STATS

Crawlers: **6**  
Rough Terrain: **3**  
On Site Total: **9**

**THE PROJECT:** On April 4, 2026, Miami Freedom Park and Nu Stadium officially opened to the public. The new entertainment district is now a major hub for the city, replacing the interim Chase Stadium in Fort Lauderdale while introducing a vast footprint of restaurants, outdoor wellness, and other entertainment options to the area. This ambitious project required a full-service lift solutions provider to build the exterior and interior of the stadium over the course of eight months.

**THE CHALLENGE:** Building a 10.5-acre stadium within a 131-acre private development that will have 58-acre public park, public soccer fields, 750-room hotel and one million square feet of office, retail & commercial in the heart of a densely populated city requires immense precision, strict adherence to timelines, and an unwavering commitment to safety. Maxim drew upon its historical expertise with stadium projects in major cities to move forward in the safest, most efficient manner possible, with minimal disruption to surrounding city life and deep collaboration with all stakeholders.

**OUR APPROACH & SOLUTION:** The scope and scale of this project required comprehensive lift solutions while adhering to the highest safety standards. Maxim brought in a total of nine cranes for this job. Two 275-ton crawler cranes, two 230-ton crawler cranes, one 200-ton crawler crane & one 110-ton crawler crane. Meanwhile, two 75-ton rough terrain cranes and one 90-ton rough terrain crane provided support for the building's shell for a total of five months each.

**EQUIPMENT USED:** Maxim used top-tier lifting equipment for this project, specifically selected for the site's constraints and load requirements:

- (3) 275-ton crawlers - Manitowoc 999 S3, Liebherr LR1200SX & Kobelco CK2750G-3
- (1) 300-ton crawler - Manitowoc 2250
- (1) 200-ton crawler - Manitowoc 777
- (1) 110-ton crawler - Link-Belt LS-218HSL
- (1) 90-ton rough terrain crane - Linkbelt RT8090-II
- (2) 75-ton rough terrain cranes - Linkbelt RTC8090-11 as 75T & Grove RT890E as 75T

**RESULTS & IMPACT:** Miami Freedom Park and Nu Stadium officially opened on April 4, 2026, bringing in a new era of entertainment for the vibrant city. Maxim's efficient, safe process which included 4000 labor hours completed without major incident allowed the city to adhere to timelines and deliver the results it promised to its half-a-million residents.

**THE MAXIM ADVANTAGE:** Miami Freedom Park came to Maxim Crane not just to provide cranes for their lift, but to provide high-quality equipment and critical guidance that would bring this project safely to completion. Drawing on our elite team of engineers, sales representatives, operators, and more, Maxim Crane is experienced in providing support to turn-key solutions. We don't just sell the job. We see it through.

**BRING MAXIM'S EXPERTISE TO YOUR NEXT PROJECT:** Whether you're building a new stadium or renovating existing infrastructure, Maxim is here for our nation's entertainment solutions. As entertainment infrastructure continues to evolve, reach out to Maxim to learn how we can best support your lift.
